

Mimio Calibration Tip

In order to keep the calibration between restarting the board software or restarting your computer, do the following:

- 1. Open MimioStudio***
- 2. Calibrate the board with the pen***
- 3. Choose Tools (at top)***
- 4. Settings...***
- 5. Interactive***
- 6. check the box that says "use previous calibration"***
- 7. Apply***
- 8. OK***

If you every find that your pen is not working correctly with the board and the calibration is off, you can force a calibration by pressing the bottom button on the left side of the board.
